## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re Claim 2, it is unclear what is meant by "reversing and inverting" the signal column. Applicant is request to reference the specification. For instance, does "reversing" and "inverting" have the same meaning.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities:

Claim 1, line 7, "the relation" should be –a relation-. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2663

5. Claims 1, 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Abeta et al U.S. Patent Number 6,647,003.

Re Claim 1, fig. 1 teaches a channel estimation unit 100 (a frame unit) performing the functions according to fig. 3, wherein the receiver receive pilot symbol and stores the column sequences demodulated into Channel Estimate Acquisition Sector 120 (storing column sequences...for channel estimation and frame synchronization); step S202 of fig. 3, calculate an average of pilot symbols (obtained from the relation between the column sequences) in each pilot block based on the generated pilot symbol S201 (a pattern characteristic); S204 performs to obtain a channel estimate of each data symbol by summing the pilot block average (adding the converted column); fig. 5 (See col. 7, lines 12-40 & col. 8, lines 44 +) teaches Compensating the Channel fluctuation processing in the data symbol sequence using the channel estimate (correlation process...added result to a previously designated code column).

Re Claim 3, refer to Claim 1, wherein fig. 3 inherently has a memory to perform the channel estimation.

***Allowable Subject Matter***

6. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claim 1 and 4; 3 and 7, prior art fails to teach a relation between the column sequences is based on the claimed equation.

***Response to Arguments***

7. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 703-305-1500. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
